About The Course

Dot Net is 1 of of Leading Technologies in World developed by Microsoft available in Visual Studio for development. Blended by ease of use and development with drag and drop features It is one of the most preferred technologies for quick web mvc applications. C# or C Sharp being the primary language for programming supported by Asp.net for web application development and MVC.net for MVC projects. Apart from this it also provides data persistence via Entity Framework & Web Services using WCF/Web API to interact with non Dot Net projects that makes it one of the most sought technologies for developing n-tier Complex Application Projects and also taught in this course. Learn all the technologies mentioned above and **become a Full Stack Dot Net Developer !**
